CMS defines **Integrated** as:

“Full access to the benefits of community living.”

We also know that...

Services are to be Individualized/person-centered

- Person-centered is a process that results in a person centered plan with individually identified goals and preferences.
- This planning process, and the resulting person-centered service plan, will assist the individual **in achieving personally defined outcomes in the most integrated community setting, ensure delivery of services in a manner that reflects personal preferences and choices, and contribute to the assurance of health and welfare.**
