

# Good BEGINNINGS

## How is your child GROWING?

**A checklist of  
Infant and  
Toddler Growth**

### Dear parents and caregivers:

Most babies and toddlers follow a typical pattern of growth and behavior. Inside are listed some typical behaviors you can expect of your child as he or she grows. Many children will be able to do these things earlier than listed. However, if your child is not doing some behaviors by the age listed, please consider talking with your doctor or a community health nurse. It is very likely not a concern, for all children will develop in their own way. However, children who are slow at showing the behaviors listed inside may benefit from services available to you and your family. The earlier services begin the better for your baby.
